

# GARRETT-KEYSER-BUTLER CSD

## iPad Chargers Issued to Students

For the 2017-18 school year, Garrett-Keyser-Butler CSD will be following the model outlined below for iPad chargers/cords issued to students. After discussions with other school districts, Garrett-Keyser-Butler CSD has decided to follow their model outlined below:

- Students will be issued a charger/cord with their iPad only **one time**.
- This charger/cord is for duration the school district has this iPad (next 5-years)
- Chargers/cords will **not** be collected at end of year, students will reuse the same one next year
- If a student loses/damages any part of charger, they must go to store and replace...no longer available from the GKB Tech Dept.
- If a student has a charger not working properly, they should take it to Tech Dept to be inspected
  - Upon inspection:
    - If the charger is deemed to be faulty, the Tech Dept will provide a replacement.
    - If the charger is deemed to be physical damage caused to the charger/cord, the Tech Dept will provide the student with this note containing the information below to take home to parents informing them to purchase a replacement.
- Only new students during the school year and each year's Kindergarten will be issued chargers/cords from the Tech Dept.
- Replacement charger/cord needs to be Apple MFi (made for iPhone, iPad, and iPod) certified charging and syncing cable for your Apple devices to ensure proper/safe charging.
